Toyota HiAce

*Frontline and HiAce
an Australian tradition*

Wider body, wider choices, the ultimate HiAce campervan

Frontline has once again transformed the ever-popular HiAce into a comfortable & functional Campervan. The drivability and good old Toyota reliability will make this Campervan a popular choice for years to come.

A significant development is the bonneted body style that places the engine up front, providing increased front end collision protection. Being seated behind the engine bay, allows for comfortable bucket seats for increased comfort, plus a walk-through cabin for increased functionality. With further improvements to safety, the HiAce now includes seven airbags and obtains a 5-star ANCAP rating.

Cabin entry is also made easy via a low large step and grab handles as standard. Another bonus of the current model HiAce is a generous increase to internal width, and clever design has been applied by Frontline to maximize space, creating a very spacious feel to the camper.

The smooth and stable ride are massive improvements, offering an effortless and more car-like driving experience. The 2.8 litre turbo Diesel engine produces 130kW and 450Nm of torque, via a 6 speed manual or automatic transmission.

The Frontline full elevation pop-top roof system offers superior ventilation and standing room throughout the full length of the Camper. A kitchen area with a fridge/freezer, sink, twin electric element or optional gas cooktop and storage drawers is provided to whip up those essential meals on the go.

Moving down the vehicle, are various storage compartments for food and clothes. Commonly a large boot is accessed by the tail gate and then inconspicuous while shut.

The standard auxiliary battery system will run the Campervan fridge, lights, water pump and fan as needed for up to 2 days, with further upgrade options available. The battery system is charged by the vehicles engine or 240V mains power, solar charging can be added for remote stays. There are multiple 12v and USB sockets to charge devices or other low amp accessories.

If its comfort, safety and a long list of standard inclusions that you want, the Toyota HiAce Frontline Campervan could be the one for you.

Frontline has manufactured over 4,000 quality campervans since 1987. We pride ourselves on maintaining a very well respected name by constantly producing quality products with highly trained staff, quality fittings and excellent after sales service.

Choose from five flexible smart campervan layouts to suit your camping style
